

Got Drought? Impacts of Drought on Wells & Landscaping

SWRPC's Natural Resources Advisory Committee, Antioch University, and Cheshire County Conservation District are co-sponsoring an event to raise awareness and answer questions regarding the impact of drought conditions and proactive strategies we can take.

When: Tuesday, May 23, 2017 6:00 to 8:00 p.m.

Where: Antioch University Community Room, 40 Avon Street, Keene

A team of four panelists will cover drought related topics of interest to municipalities and homeowners such as:

- current drought designation in NH
- symptoms of a failing well and what to do
- how to know how deep your well is
- well head protection requirements
- water conservation for indoor and outdoor usage
- climate change and concerns for the future
- landscaping methods during dry periods

Panelists include:

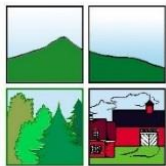

Stacey Herbold, Water Conservation Program, NHDES

Michael Simpson, Co-Director, Center for Climate Preparedness and Community Resilience, Antioch University, New England

Rick Schofield, Water Well Protection Manager, NHDES

Liz Kelly, Planning Technician, SWRPC

The event is free, but **registration is required by May 22nd**. Light refreshments will be served. To register, or for questions, please send an email to Lisa Murphy at lmurphy@swrpc.org or call (603) 357-0557.
